

Citadel

Brass handrail and balustrade system

"The traditional richness of brass"

The Product

Citadel is a brass balustrade and handrail system which is designed around 50 mm diameter brass tube for both the balusters and the handrail. As an alternative the handrail can be supplied in 38 mm diameter.

The fittings, such as glass brackets, wall brackets, baluster tops are supplied in either brass or stainless steel.

Design Possibilities

The infill panels can be toughened glass, either clear or tinted, mid-rails in either brass or stainless steel, and stainless steel wire.

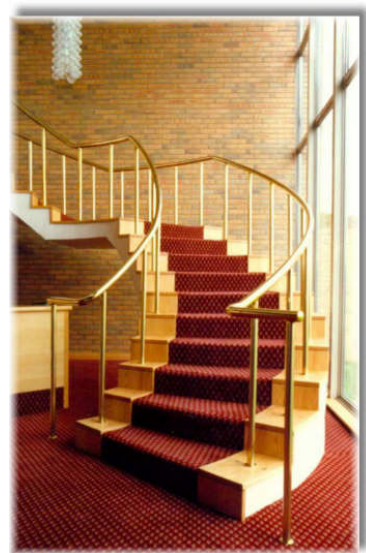

Finishes Available

Citadel is available with a bright or satin polished finish and can have a clear lacquer baked on to the surface after polishing if required.

This option removes the need for the frequent polishing always needed to keep brass in prime condition.

Applications

Citadel is designed with prestigious venues in mind whether commercial, public or private buildings.
