

AL 50

Aluminium balustrade system

December 2016

AL 50 is designed to give balustrade a “lighter profile.” By using “thick wall” aluminium balusters wider spacing can be achieved.

The Product (material)

AL 50 is designed around 50 mm, (2”) dia. “thick wall” aluminium tube for the balusters enabling them to be spaced at up to 2.00 metre centres, thereby keeping costs down.

The surface finish

Aluminium naturally has a smooth surface which is an ideal base for powder coating. The surface can be further improved with either fine satin or bright polish finish. For exterior applications powder coating is essential.

Handrail

is either 44 mm or 48 mm diameter aluminium or alternatively handrail from our [Stargard](#) “warm to the touch” range

Balusters

50 mm diameter aluminium with a range of base fixings (Pocket, baseplate or side fixing).

Infill panels

are available in glass, perforated metal, stainless steel wire, “running rails” or vertical bar infill.

Applications:

from main staircases to access ramps and balconies, public, commercial or private developments.

A special, anti-microbial coating is available in a range of colours for such locations as health/medical centres, doctors and dentists surgeries, care / retirement homes.
