“The traditional richness of brass”

Brass handrail and balustrade system

The Product

Citadel is a brass balustrade and handrail system which is designed around 50 mm or 38 mm diameter brass tube. It is intended for interior applications although with a clear lacquer coating applied it is suitable for exterior applications.

The surface finish

Is normally bright polished but a fine satin finish can be supplied.

To avoid the need for frequent polishing a clear lacquer finish can be applied after polishing.

Handrail

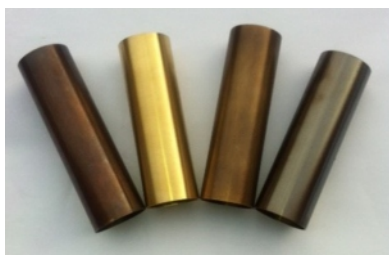

Is either 50 mm diameter or 38 mm diameter, which can include LED INSERT lighting (see Illumine data sheet) or the traditional “oval” section.

Balusters

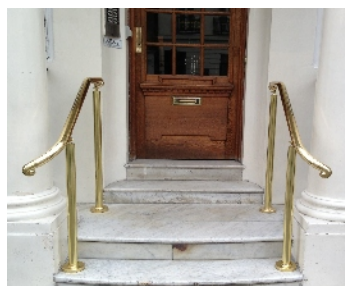

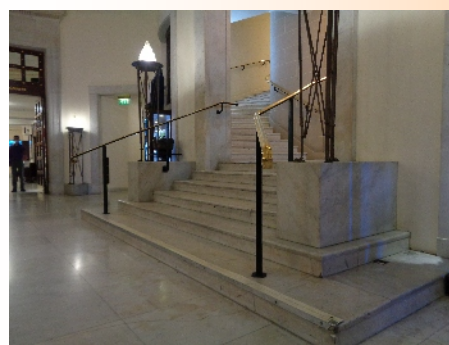

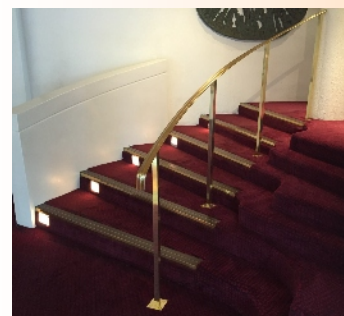

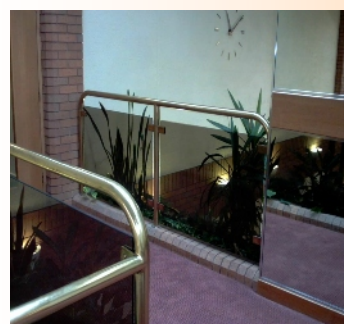

Are 50 mm diameter brass as standard, however, the brass handrail can be fitted to a range of baluster designs.

Infill panels

Are available in glass (clear or tinted) or “running rails” in brass.

Alternative finishes:
Bronze-Satin-Antique-Chestnut
