

Sentinel

A component based stainless steel system, tailored to suit the clients specific requirements.

February 2017

The Product (material)

Stainless steel grade 304 for interior and grade 316 for exterior applications.

The surface finish

can be either fine satin, bright polished, powder coated or a combination of polished and powder coated.

Handrail

is either 42 mm or 48 mm diameter stainless steel, or “warm to the touch” (Stargard range). Both can incorporate LED INSERT lighting (see Illumine data sheet). Timber handrail (Coppice range) which can be with or without stainless steel bends is also available.

Balusters

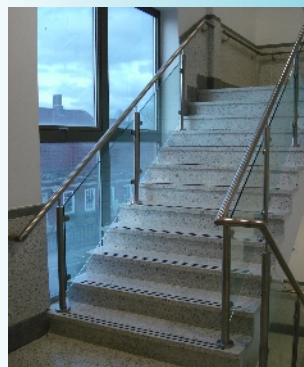

48 mm diameter or “flat” baluster design in stainless steel with a range of base fixings (Pocket, baseplate or side fixing).

Infill panels

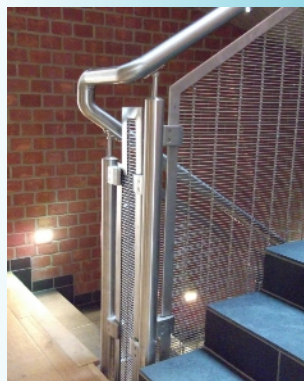

are available in glass, perforated or woven metal, stainless steel wire, “running rails” or vertical bar infill.

Applications:

Main staircases to access ramps, Juliette balconies to full balconies, public, commercial or private developments.

Glazed Sentinel balustrade

Woven metal infill panels

Glazed Sentinel to a balcony
