

Glassrail

Structural Glass balustrade system

Clarity, elegance and strength

Glassrail is a balustrade system without balusters. It is connected to the floor or stairs by the glass panels themselves.

Handrail

Can be fitted to the top edge or side face of the glass. The handrail options are, stainless steel, brass, timber, or powder coated steel. LED Lights can be incorporated into some of the handrails.

Glass Panels

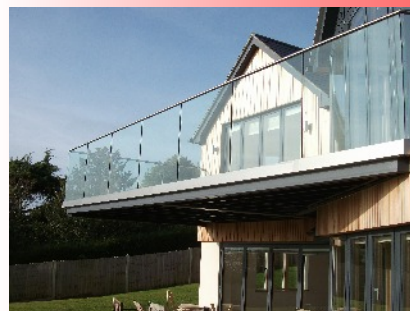

The thickness of the glass is dependant on the application and loading requirements, but ranges between 15 mm and 25 mm.

Base fixing

The glass panels can be fitted to the top or side of the stair or floor. They can be fitted by channel section, clamping plates or stainless steel clamping discs.

Glassrail is suitable for interior or exterior applications, commercial, public or private buildings.
