BPI ILLUMINE

Illuminate your path with BPI Illumine, our LED integrated handrail system. Featuring individual LED inserts, positioned by hand, BPI Illumine is a high-quality handrail system built to elevate any project.

Unlike traditional lighting, handrail lighting provides soft, natural illumination without harsh glare, making it ideal for both safety and aesthetics.

The benefits of BPI Illumine include:

- **Energy Efficient** - LED handrails consume significantly less energy compared to traditional lighting
- **Safe Handrail** - Emergency options, dimming and motion sensors available
- **Variable Spacing** - To suit required lighting levels
- **Durable** - Ingress protection rating of IP67 and an impact rating of IK10

Variable spacing ensuring optimal light placement in comparison to traditional strip lighting

Ideal for **outdoor** pathways, ramps, steps in public and private spaces

Energy efficient in comparison to traditional lighting - **100,000 hour lifespan, using 1 watt of power**

Increase accessibility and visibility in dimly lit areas

Compatible with **BPI Stargard - 'Not Cold to Touch' PVC DDA Handrail**
